

JO SONJA'S®

COLOUR CONVERSION CHART

(LAST UPDATED: 29th July, 2002)

Jo Sonja's COLOR CONVERSION CHART is a unique tool for artists concerned with the quality and longevity of their painted pieces. The colors listed are not suggested colors that are similar in other brands, but **actual mixes** for an exact color match. Each color was tested and retested to assure its accuracy. Chroma Inc. expresses appreciation to *Londi Rowley* for the information contained in this useful tool.

Jo Sonja's Decorative Painting System was designed specifically to meet the needs of artists who demand the finest quality products to insure lasting color brilliance. **Jo Sonja's Decorative Painting System** includes *Artists' Colors* and *Mediums* for use together for unlimited techniques and applications in creating heirloom artwork. **Jo Sonja's Artists' Colors** are tested to be light fast and will not fade over time.

When mixing color you may mix small amounts to use as you need or larger quantities that can be stored indefinitely in airtight containers such as empty 35mm film canisters. To mix small amounts of color, equate each portion of the mix to the size of a chocolate chip. For larger amounts use a clear ruler and mark off increments as desired. The simple recipe 1:1:t denotes to mix equal parts of the colors listed and the "t" refers to just a touch of that color. Mix to match and discover endless color possibilities with **Jo Sonja's Acrylic Artists' Colors**.

Please visit Chroma's Web Site for FREE product information, project and technique ideas, teacher listing and to be added to our mailing list. Bookmark our address at "www.chromaonline.com" for updates and to keep current with market trends and information.
